Textiles are an integral part of human life along the continuum of birth to death. At birth we are swaddled with a blanket and in many cultures shrouds or costume play a significant role in burial rites. Cloth evokes a unique emotional connection to ritual, memory and the senses. This group of textile artists honours the human connection to cloth through their relationships to textile traditions and the conceptual location of their artworks in dialogue with the history of cloth as cultural artifact. In contrast to the ephemeral nature of the digital world, cloth is tangible but like digital products it does not stand the test of time.

CityScape Community Art Space is a contemporary, interactive gallery that has served the community since 2001. It is dedicated to offering quality programming for the community while giving an opportunity for both emerging and established artists to exhibit and promote their work.
