

## Why Volunteer?

### 1. It's in all of us.

Whether you're holding the door open for a stranger or helping organize a fundraiser – volunteering your time is a choice. That's why we're so grateful for the amazing team of volunteers North Van Arts has worked with in its 50-year history! Community is our priority and we want you to feel welcome here.

### 2. You are a part of something.

Our mission is to build healthier, stronger communities and to enable emerging and professional artists in all disciplines. But you are a special part of this movement, because you help us bridge the space between our offices and the general public. As a volunteer for North Van Arts, you become an ambassador for this non-profit organization, representing the work we do.

### 3. We want the same things.

More diverse, artistic opportunities, more public art events, more educational programmes, and initiatives that make our neighbours proud to live here – you can help us connect better with the public, being a liaison between our staff and the tens of thousands of visitors we get every year.

### 4. It's who you are.

You're generous. Giving your time to volunteer is extremely kind, but it's also great for your health! You live happier and longer when you feel good about your work. We want to welcome the ideas and feedback you might have because North Van Arts values the individual volunteer just as much as we love our teams.

## Why Teams?

We're stronger together. One volunteer can't do everything. But we can all do something. That's why staff and volunteers work side by side at North Van Arts.

## Am I Too Late to Join?

Never! The best way to get involved with North Van Arts is to visit our offices at 335 Lonsdale and meet us in person. We'd love for you to enjoy our free gallery space and ask any questions you might have in person.

## How do I Sign Up?

Volunteer Calls are the most efficient way to get involved. We post the needs we have for which we're seeking volunteer support and then you click them to apply!
